

One source for everything email

We empower organizations with a full arsenal of cloud-based email products so they can experience all the benefits of a robust, secure, & legally compliant email security & hosting platform. **Check out our complete range of products:**

Bracket

Now email encryption is both secure and easy to use. Wrap the [subject] in brackets on any client or device to encrypt. Plus, every user gets a 1GB encrypted file-sharing page with a custom URL. Deploys to Office 365 in minutes with no MX changes.

CloudFilter

Protect your users around the clock with CloudFilter™ email security. CloudFilter™ effectively stops spam, viruses, & malware in the cloud. Suspicious messages are held in quarantine for review, while good email is delivered to the end user.

SafeSend

Stop bad email from leaving your organization while staying compliant. When your email users send out confidential files or messages caught as spam, it can severely damage the reputation of your business.

XtraMail

With XtraMail™ your users can keep working through an email outage. XtraMail™ stores a rolling 30 day backup of all your email, so when your systems are down, your users can simply login to XtraMail™ to continue sending & receiving email.

SecureStore

Email archiving with no storage and retention limits! SecureStore™ archives a copy of all incoming, outgoing, and internal email. Access your archive anytime to search and send stored mail via the secure and incredibly fast web console.

CloudMail

CloudMail™ gives you an affordable, yet robust email hosting platform which includes contacts & calendars, a large mailbox, & access from anywhere. Manage via secure webmail console or email client via (POP3 or IMAP syncing).
